Edicleo Oliveira

Full Stack Developer

SOLID Design Patterns

BARUERI, SP START IMMEDIATELY
REMOTE WORK IS A GREAT IDEA

Specialist. Focused on development for over 17 years. Controls hardware with low-level technologies, surprises with elegant high-end desktop, web and mobile solutions. Quick reasoning, identifies and solves problems in a sustainable way. Always focused on quality, it guarantees easy maintenance and evolution of complex long-term solutions.

EXPERTISE

MAIN	EXPERIENCE TIME (IN YEARS)			
	1-3	4-6	7-10	11+
Desktop	More than 17 years			
Mobile	More than 8 years			
Web	More than 13 years			

PROFESSIONAL EXPERIENCE

2022 **Senior Developer Analyst**

Sofashion Consultoria
MAR 2015 - DEC 2022

- Team leader in the development and implementation of e-commerce (web).
- API development for communication between web and mobile system.
- Contributed in the development of e-commerce application (Android).
- Consultant at information security area.

2014 **Full Developer Analyst**

Stefanini Consultoria e Assessoria em Informática
FEB 2013 - DEC 2014

- Allocated in the Medical Area sector at Unimed-Rio, I was responsible for developing and maintaining essential systems for medical care, a web solution with more than 20,000 daily accesses.
- Responsible for major changes in the sector, such as restructuring and important implementations in the main system.
- Adjustment of the system to the standards imposed by the National Health Agency, such as communication between Unimed x ANS.
- Development of a solution responsible for communication between Unimed's in other states of the country, a service that processes more than 100 thousand daily requests.

2011 **Programmer**

Ambidados Consultoria em Meio Ambiente
OCT 2013 - DEC 2011

- Founder, leader and main developer of an important tool for the Meteorology and Oceanography sector at Petrobras, capable of reducing response time by up to 30% in the processing and analysis of large data shipments. Development system to run as a service, processes highly complex mathematical calculations and performs an average of 15 million SQL statements per day.
- Migration of high complexity mathematical calculation technologies.
- Gave lectures on software development for scientists, data analysts and other programmers.

PROJECTS

WE

FEB 2023 - TILL NOW

https://github.com/edicleoline/proxy

Hardware and software development for a 4G proxy server.
The equipment consists of a modified microcomputer and some manageable electronic components.
Talking about software, a solution that provides a Restful API and a web app to control the hardware, such as routing IPs, filters, IPv4 and IPv6 proxy, Socks4 and Socks5, routes, plugins for different models of modems and cell phones, user control, bandwidth control, SMS management, and others.

Bash CSS3 Debian Flask Full-Stack HTML 5 JavaScript Material UI NodeJS Python React.JS SASS Socketio SQL SQLite TypeScript Web

Truecall

NOV 2022 - TILL NOW

https://github.com/edicleoline/berners-truecaller

Identifier and blocker of unwanted calls and messages for cell phones.

Amazon Web Services Bash Full-Stack Java Jetpack Compose Kotlin Laravel Mobile MySQL NodeJS PHP Python Selenium SQL SQLite TDD TypeScript

EDUCATION

UERJ

Universidade Estadual do Rio de Janeiro
Computer Science
2012 - 2016

TRAININGS

2018 **Advanced Penetration Testing**

HackerSec
OCT 2017 - JUL 2018

Intrusion Techniques in Corporate Networks.

2006 **Database**

FAETEC
JAN 2006 - OCT 2006

SQL, database administration, network administration and security, database analysis and modeling, Data Wharehousing and Data Mining.

2005 {} Java, OOP

FAETEC

MAR 2005 - NOV 2005

Java and Object Orientation, UML, JDBC, JavaFX, JPA, Hibernate.

2004 <> Programming

FAETEC

FEB 2004 - DEC 2004

Programming logic, Java, C#, C, C++, Javascript, Visual Basic, Games, Computing.
